Supporting Your Nutritional Needs

If you are a patient with Cystic Fibrosis or know someone who is, you will be very aware of the importance of maintaining a balanced diet. In order for your body to develop and function healthily, you will need to make sure your vitamins and minerals are supplemented accordingly.

Paravit™-CF is designed to deliver the precise amount of fat-soluble vitamins needed per day in one easy-to-take dose.

Depending on age, a patient will need to only take one or two small drops of liquid or softgel capsule per day to reach the recommended daily dose of fat-soluble vitamins for patients with Cystic Fibrosis. Your HCP will advise on the appropriate dose.

Traditionally, in order to compensate for the malabsorption issues, a patient may have had to take multiple tablets or liquid products each day in order to reach the healthy level of fat-soluble vitamins needed.
How to take Paravit™-CF?

Depending on your age or preference, you may prefer to take Paravit™-CF Liquid or Paravit™-CF Capsules.
